

Dax Outlook 2016 W39

The Dax recovered nicely last week making 300 points from 10'326 to 10'626.

The MACD is still slightly bearish, the RSI rose to 56.12 and the VDAX fell to 15.67.

The 10'800 has come back into reach since with the current recovery. For that the 10'600 should be defended during next week.
